

# A Math Solutions Course is Coming to Your Area

**RESERVE YOUR SEAT!**

## Math and Literature (Grades K-8)

In classrooms, literature often provides a context for learning to read and use language. This course extends the use of children's literature into the mathematics curriculum. Throughout the week, engaging children's books are used to pose a variety of interesting mathematical problems to challenge students' thinking and reasoning. In addition, course experiences help in the selection and use of literature as a springboard into important topics in the math curriculum.

### You'll Learn To:

- Use strategies common to literacy and math instruction to support student learning.
- Use children's books to present problem-solving experiences from various strands of the mathematics curriculum, including number and operations, probability, geometry, measurement, and algebra.
- Incorporate communication into mathematics instruction.
- Help students enjoy math as they increase their understanding and confidence.

You'll leave this course with a deeper understanding of the math you teach, and a wealth of ideas to take back to your classroom.

## Enrollment Includes:

- A Math Solutions resource book full of classroom-tested lessons
- A sample kit of manipulative materials
- A subscription to our online newsletter
- Discounts on Math Solutions books and resources

## Course Information:

**Dates:** July 24-28, 2006

**Time:** 8:30-3:45

**Place:** Ridgeroad Middle School  
4601 Ridge Road  
North Little Rock, AR 72116

**Host:** Arkansas Department of Higher Education

**Credit:** TBA

**Fee:** \$395

**Register By:** June 14, 2006
